

# GENOCIDE

Genocide *n* the deliberate extermination of a people or nation

## GENOCIDE BY A TREASONOUS STATE

The purpose is to turn the fiction: “there are no indigenous people”, into a reality.

- Change the law to make people subordinate to the State.
- Use mass immigration, and forced emigration, so that the indigenous people become a minority in their own land.
- Make those people ignorant of their own ancestry, cultural heritage, and native entitlement.
- Dismantle those cultural institutions that protect, nurture and sustain the indigenous community.
- Use State propaganda and conditioning techniques to trick the indigenous people into participating in their own demise.
- Politically indoctrinate, and arm the police force.
- Criminalise dissent; criminalise assertions of native entitlement.
- Brutalise society.
- Incite hatred and violence, targeted against the indigenous people.
- Treat native resistance as ‘terrorism’, and kill those who resist.
- Only when the indigenous population is small enough, initiate civil war.
- Allow the war to continue, until “there are no indigenous people”.
