

INTERRACIAL VIOLENCE

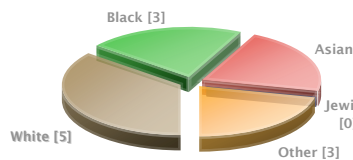

Confirmed¹ Racist Murders (England and Wales, 1997-2007)

This report summarises analysis of racially motivated murder based on the latest available (circa December 2008) official recorded crime data¹. The work follows on from earlier studies undertaken in 2006 and 2007. The analytical methods used in the preparation of this report are detailed in the author's previously published work². A strict evidence-based criterion is applied (by the police) to confirm the racial motivation for these murders. This is a much more stringent test than that of Macpherson and hence the (seemingly) low number of recorded cases.

| Ethnicity of Victim | Victims 1997 to 2000 | Victims 2001 to 2004 | Victims 2004 to 2007 | TOTALS |
|---------------------|----------------------|----------------------|----------------------|--------|
| White | 5 | 12 | 15 | 32 |
| Black | 3 | 3 | 2 | 8 |
| Asian | 3 | 4 | 4 | 11 |
| Jewish | 0 | 0 | 0 | 0 |
| Other | 3 | 2 | 0 | 5 |

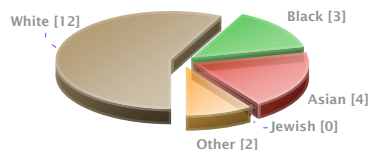

Victims of Racist Murder [1997-2000]

ANALYSIS:

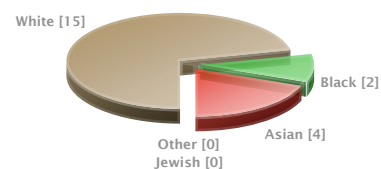

White victims over-represented by a factor of: **x 24**

Victims of Racist Murder [2001-2004]

White victims over-represented by a factor of: **x 30**

Victims of Racist Murder [2004 - 2007]

White victims over-represented by a factor of: **x 32**

We would expect, all things being equal, to see more than 40 ethnic minority victims of racially motivated murder, for every 1 white victim - simply due to the population ratios. What we in fact see is very different - 2 ethnic minority victims, for every 5 white victims. These results therefore show the hugely disproportionate (and growing) number of white victims of racist murder.

¹ Crime data for White, Black Asian and 'Other' ethnic groups from the Ministry of Justice (formally Home Office) documents: 'Statistics on Race and the Criminal Justice System - A Home Office publication Under Section 95 of the Criminal Justice Act 1991' - Edition 2000 [pub. 2000]; Edition 2004 [pub. 2005]; and Edition 2006/7 [pub. July 2008].

INTERRACIAL VIOLENCE

Confirmed¹ Interracial Homicides (England and Wales, 1997-2007)

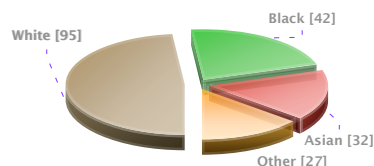

This report summarises analysis of interracial homicide based on the latest available (circa December 2008) official recorded crime data¹. The work follows on from earlier studies undertaken in 2006 and 2007. The analytical methods used in the preparation of this report are detailed in the author's previously published work².

A strict evidence-based criterion is applied (by the police) to confirm the interracial nature for these killings.

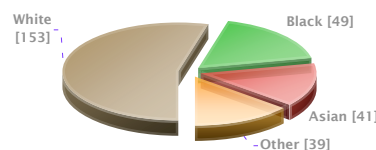

This analysis includes the victims of the 7th July 2005 terrorist bombings in London (victims: 37 White, 5 Black; 7 Asian and 3 'Others').

| Ethnicity of Victim | Victims 1997 to 2000 | Victims 2001 to 2004 | Victims 2004 to 2007 | TOTALS |
|---------------------|----------------------|----------------------|----------------------|--------|
| White | 95 | 153 | 164 | 312 |
| Black | 42 | 49 | 51 | 142 |
| Asian | 32 | 41 | 42 | 115 |
| Other | 27 | 39 | 35 | 101 |

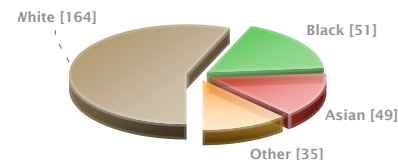

Victims of Interracial Homicide [1997-2000]

Victims of Interracial Homicide [2001-2004]

Victims of Interracial Homicide [2004 - 2007]

ANALYSIS:

White victims over-represented by a factor of: **x 24**

Disproportionality ratio* = **x 19.1**

White victims over-represented by a factor of: **x 22**

Disproportionality ratio* = **x 21.4**

White victims over-represented by a factor of: **x 19**

Disproportionality ratio* = **x 19.1**

* Analysis of the 'Disproportionality ratio' reveals that, for over the last 10 years, the homicidal killing of White people is approximately 20 times more prevalent in the minority ethnic (BME) community than the homicidal killing of BME people is prevalent in the White community. This very disturbing characteristic of interracial homicide - masked by the differences in population sizes - is revealed by detailed analysis of official crime data (HO, MoJ)¹.

¹ Crime data for White, Black, Asian and 'Other' ethnic groups from the Ministry of Justice (formally Home Office) documents: 'Statistics on Race and the Criminal Justice System - A Home Office publication Under Section 95 of the Criminal Justice Act 1991': Edition 2000 [pub. 2000]; Edition 2004 [pub. 2005]; and Edition 2006/7 [pub. July 2008].

INTERRACIAL VIOLENCE

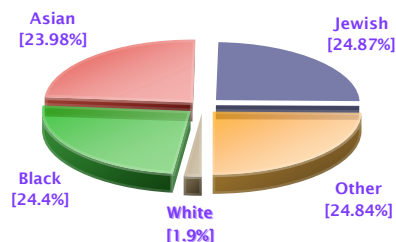

Ethnic Communities' Experience Of Racist Violence (England and Wales, 2005)

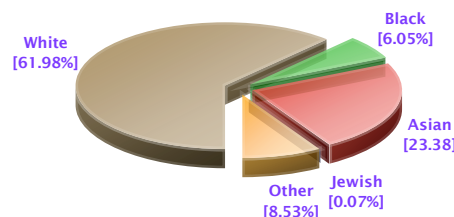

This report summarises analysis of racially motivated violence based on the latest available (circa December 2005) official recorded crime data¹. The work follows on from earlier studies undertaken in 2006 and 2007. The analytical methods used in the preparation of this report are detailed in the author's previously published work².

| Ethnicity of Victim | Population Proportion | % Victims Expectation | Number of Actual victims ^{2,3} | % Victims Actual | Disparity |
|---------------------|-----------------------|-----------------------|---|------------------|---|
| White | 0.9240 | 1.90 | 75,912 | 61.980 | White victims over-represented by a factor of x 33 . |
| Black | 0.0239 | 24.40 | 7,408 | 6.050 | In regard to the proportion of incidents of racist violence that result in <u>wounding</u> , then it is the White community that suffers considerably more so than the minority (BME) community |
| Asian | 0.0405 | 23.98 | 28,634 | 23.380 | - with 27 per cent of cases of White victims, compared to just 9 per cent of cases of BME victims. |
| Jewish | 0.0053 | 24.87 | 82 | 0.067 | |
| Other | 0.0063 | 24.84 | 10,446 | 8.530 | |

Expected Proportion of Victims of Racist Violence [2005]

Actual Proportion of Victims of Racist Violence [2005]

It is of concern to see various Government agencies publishing false and misleading analysis of racial violence. For example, both the CRE and the ODPM⁴ attempt to explain the hugely disproportionate number of white victims as due to white people being "the overwhelming majority". However they will know that the number of victims of racist violence should be proportionate to the size of the offenders' ethnic group(s) - and not to the size of the victims' group.

¹ Data for the White, Black, Asian and 'Other' ethnic groups from the Home Office report: OLR 25-06, 'Black and Minority Group's Experiences and Perceptions Of Crime, Racially Motivated Crime and The Police: Findings From The 2004/05 British Crime Survey'.

² Research reports: (a) 'Ethnicity and The Experience of Crime in England and Wales', November 2006; and (b) 'A Preliminary Analysis of the Ministry of Justice Document: Statistics on Race and the Criminal Justice System -2006', November 2007

³ Data for the Jewish community is from the Community Security Trust (CST) report for 2005. The CST describes itself in the following terms: "The CST is the only organisation that records these [anti-Semitic] incidences nationally, and is recognised by Police, Government and international bodies as the authority on anti-Semitic incident levels in Britain".
